PROFESSIONAL SUMMARY

4 internships. One company. Increasing ownership each semester. Thinks in funnels, builds in code, measures in outcomes. Product thinker with full-stack depth. Shipping since third year.

CAREER HIGHLIGHTS

7x

Motor Insurance
DAU growth (2K → 14K)

12x

daily policy sales
scaled (5 → 60)

10+

software projects
built end-to-end

500+

competitive
programming
problems solved

CORE SKILLS

PRODUCT MANAGEMENT

PRDs, funnel optimization, A/B thinking, user research, GTM, feature rollout, stakeholder management

DATA & ANALYTICS

SQL, Metabase, funnel analysis, Excel, Google Sheets

DESIGN & SPECS

Figma, Visily, wireframing, prototyping, user flows

LANGUAGES

C++, Python, JavaScript, TypeScript

FRAMEWORKS

React, Next.js, Node.js, FastAPI, Flask

TOOLS & PLATFORMS

Git, Docker, GCP, Firebase, Vercel, GitHub Actions, Jira, Notion, Postman, MoEngage

DATABASES

PostgreSQL, SQLite, Redis, ChromaDB

CONCEPTS

DSA, System Design, LLM Integration, RAG, REST APIs, CI/CD

CERTIFICATIONS

Google Cloud

RAG · GenAI Apps with Gemini and Streamlit

JPMorgan Chase (Forage)

Software Engineering Job Simulation

Microsoft & LinkedIn

Career Essentials in Software Development

EDUCATION

JECRC University

Aug 2023 - Apr 2027

B.Tech, CS (AI and ML) · Xebia
Specialization

SUMMARY

Product Manager with a strong engineering background and 4 product internships across insurance, automotive, and consumer-trust products, taking on increasing ownership each semester. Part of the core team that scaled the Motor Insurance vertical from **2,000 to 14,000 DAU (7x)** and daily policy sales from **5 to 60 (12x) in 8 weeks**. Built full-stack and AI-powered products, solved **500+ competitive programming problems**, and leverage technical depth to prototype faster, collaborate effectively with engineering teams, and make stronger product trade-off decisions.

PROFESSIONAL EXPERIENCE

Park+ — Product Intern Journey (4 Internships)

2024 – 2025 · Gurugram, India

Product Intern, Motor Insurance

Jun – Aug 2025

- Joined the Motor Insurance team during the soft-launch phase, conducting **60–80 customer feedback calls daily (1,000+ total interactions)** to identify friction points across the insurance purchase journey.
- Translated user insights into PRDs, user flows, and wireframes, redesigning key parts of the funnel including vehicle verification, quote discovery, policy comparison, and pricing presentation before the full-scale launch.
- Pitched and launched a WhatsApp re-engagement channel, segmenting users based on policy-expiry behavior and delivering **49K+ targeted messages** that generated **3K+ app opens (~6% open rate)** and reactivated high-intent users.
- Part of the core team that scaled the Motor Insurance vertical from **2,000 to 14,000 DAU (7x)** and daily policy sales from **5 to 60 (12x)** within **8 weeks**, while building internal tooling and workflow automations that drove **15+ additional policy conversions per day**.

Product Intern, Automotive & Discovery

Jan – March 2024

- Analysed friction across the Test Drive booking and lead-management workflows, informing a funnel redesign that drove daily test-drive bookings from **50 to 100+ (2x increase)**.
- Partnered with product, design, and engineering teams to build the Dealer Review and Test Drive Review ecosystem, defining user flows and feature specifications, generating **150+ reviews in the first week** and scaling to **200+ dealer reviews and 250+ vehicle reviews daily**.

Product Intern, Execution & Growth

Jun - Aug 2024

- Identified trust as a key barrier in the test-drive journey, where users lacked confidence in dealers and vehicle recommendations.
- Proposed and launched Phonebook, a social-discovery feature that synced users' contacts and surfaced trusted connections who owned a car or had taken a test drive through Park+.
- Scaled the feature to **4,000+ DAU** by syncing and matching **1Cr+ user contacts** against the Park+ network, enabling trust-based discovery through existing social connections.
- Built prototypes and collaborated on the implementation of contact-sync infrastructure and matching logic to enable trust-based social discovery.

Product Intern, Onboarding & Foundations

Jan - Feb 2023

- Built a foundation in product management by participating in product discovery, planning, and execution discussions.
- Developed technical understanding by collaborating closely with engineering teams during feature development.

PROJECTS

AI Interview Coach | Independent, 2025

Built a local-first AI mock interview tool, chose local inference (Ollama) over cloud APIs so personal recordings never leave the device. Designed end-to-end: recording flow, AI analysis, critique output.

AI Resume Tailor | Independent, 2025

Built and launched an AI-powered resume tailoring platform that improves ATS alignment through automated scoring, JD-based optimization, and RAG-driven semantic matching.
